

## WLMPS

Water Leak Puck with Switch Relay

### Key Features:

- Water leak switch for HVAC / water heater drain pans
- Can be used to detect water or the absence of water
- N.O. and N.C. relay
- Plenum Rated
- 1950mm Core cable

### Product Overview:

The S&S WLMPS water switch leak finder is designed to prevent catastrophic flooding, damage to floorings and walls by quickly detecting water leaks. The built in isolated SPDT relay changes state in alarm and provides a N.O. and N.C output. Making the WLMPS perfect for air handler / water heater or home automation controls. The 1950mm core cable provides the power and relay connections and is plenum rated, ideal for installation in drop ceilings in hospitals, schools and airports. Water detection is via two electrodes protruding from the base of the sensor, the resistance between to two is made possible by the presence of moisture.

### Technical Specifications:

<b>Alert Indication</b>	Visual	<b>Operating Current</b>	0-20mA
<b>LED</b>	Dual Green / Red	<b>Working Humidity</b>	5% ~ 95%
<b>Electrical Classification</b>	Class 2	<b>Working Temperature</b>	-20c ~ 60c
<b>Cable Length</b>	1950mm	<b>Cable Type</b>	Plenum Rated
<b>External Power</b>	AC9-26V, DC9-36V	<b>Water Type</b>	Regular Moisture Condensate
<b>Relay</b>	Volt Free SPDT		
<b>Housing</b>	304 Stainless Steel
